📄 Explore Our Work – Codebytushu

🏢 About Us

Codebytushu is an IT initiative founded with the vision to inspire learning, build innovative digital solutions, and create real-world projects. With strong expertise in **MERN stack, web technologies, and creative problem solving**, our goal is to become a trusted name in the IT industry.

We are driven by the idea of making coding simple and accessible for everyone while building impactful solutions for businesses and individuals.

🎯 Mission

To deliver innovative and practical solutions in the IT industry while empowering learners and developers with free resources and tutorials.

👁 Vision

To establish Codebytushu as a recognized company in the IT industry, contributing to real-world problem solving, digital transformation, and accessible education for aspiring developers.

⚙️ Our Expertise

- **Web Development**: Responsive apps using **MERN stack** (MongoDB, Express.js, React.js, Node.js).

- **Frontend Design**: User-friendly and modern interfaces using HTML, CSS, JavaScript.

- **Backend Development**: RESTful APIs, authentication, data management.

- **Tools & Platforms**: Git, Docker, Postman, SQL, MongoDB.

- **Creative Services**: Video editing, photography, and digital content creation.

🚀 Featured Projects

1. **Myntra Clone** – Fashion e-commerce clone app with a wide range of products & responsive design.

2. **Pinterest Clone** – Responsive web application built with MERN stack.

3. **Insta Clone** – Full-stack application with user authentication, posting, liking, and commenting.

4. **Spotify / E-Commerce / Food App Clones** – Tutorials & demo projects available on GitHub and YouTube.

🏆 Achievements

- Organized **coding competition & hackathon** at college fest (2023).

- District-level **General Knowledge competition** winner.

- Actively contributing **open-source projects & tutorials** for the developer community.

📺 YouTube – Codebytushu

Our official YouTube channel focuses on **tutorials, free coding projects, and development guides**, helping learners grow in the IT field.
